

Who can't go to hot springs

I think everyone can understand this by now, but
it's normal to be stared at even when walking around with clothes on,
so if you get naked in a hot spring, you can be sure that people will stare at you,
which is super embarrassing!

Amplitude of life

Ocean waves come in all sizes. Sometimes they're calm, while other times they can be high waves, like tsunamis caused by earthquakes or stormy weather. While it would be best if the waves were always calm, tsunamis and high waves can occur anywhere and at any time. Those who have experienced a tsunami can avoid the worst effects if they don't forget how to respond. I think it's best to think of life in terms of waves.

Digression

The US military operation involved a sonic attack (this time)...

- * Disables weapons
- * Sends sound waves into the brain, causing damage
- * Recently, "invisible people" using camouflage have become a reality.

This was the first time I'd heard of a sonic attack.

Doubt

I heard something,

but what is "**Mebae**"...?
